MARKINTUS CORTEZ MORRIS

FINAL DATA SUBMISSION XYV92 06/24/2021

Excel Used

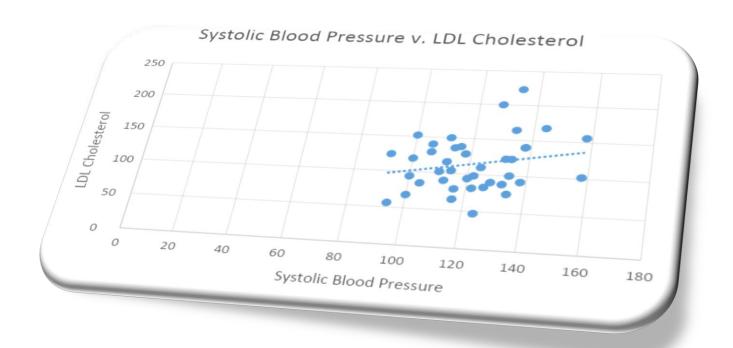

1. Lower Limit: 115.983, Upper Limit: 126.217

2. Null: mean = 100, mean > 100

p-value: 0.0001

Because the p-value of 0.0001 is lower than our significance level of 0.05, we reject the null hypothesis. We have sufficient evidence to conclude that the true population mean of systolic blood pressure is greater than 100 mm Hg.

3.

4. R = 0.257

5. P-value: 0.1093

Because the p-value is higher than the significance level of 0.05, we fail to reject the null hypothesis. There is insufficient evidence that systolic blood pressure is correlated with LDL cholesterol.
